- Houston Hispanic Chamber of Commerce
- Houston Technology Center
- Jefferson County Medical Society

Sustainability

Participation fees, value added services and community support

Accomplishments:

- recognized by Information Week as one of the country's 8 leading HIEs
- connected to HIETexas and Healthway (U.S)
- interfacing with all prevalent EHRs

Greater Houston

HEALTHCONNECT

FAST FACTS

Purpose

Healthconnect enables care coordination across the community through a secure network of electronic health record systems (EHRs) that links all providers in Southeast Texas. This connectivity at the point of care allows higher quality, more efficient healthcare delivery.

Organizational Structure

Healthconnect is a not-for-profit, neutral entity governed by a community volunteer board, with initial support provided by a grant through the Office of the National Coordinator for Health Information Technology (ONC) and the Texas Health and Human Services Commission.

Date Established

2010

Service Area

23 counties serving 6.8 million people, 133 hospitals and 14,000 physicians

Market Share

Healthconnect currently serves 39% of the region's physicians and 51% of the hospital market.

Services

- **Clinical Integration:** by connecting providers' EHRs, caregivers have access to all community-wide information and images within their EHR's clinical workflow. The patient's community health record remains current by query-search or Direct Messaging between providers.
- **Image Sharing:** enables providers to access and share medical images across the community.
- **Web-Based Portal:** can query patient records via a secure link.
- **State and National Connectivity:** providers can securely share and access patient health information with providers outside the region.
